

## Tableau Desktop II - Intermediate

Course#:DT2  
Duration:2 Days  
Price:1500.00

### Course Description

This course is designed to provide you with the skills required to become a Tableau power user. The course is designed for the professional who has solid working experience with Tableau and wants to take it to the next level. You should have a deep understanding of all the fundamental concepts of building worksheets and dashboards, but may scratch your head when working with more complex issues.

### Objectives

At the end of this class, you will be able to:

- Build advanced chart types and visualizations
- Build complex calculations to manipulate your data.
- Use statistical techniques to analyze your data.
- Use parameters and input controls to give users control over certain values.
- Implement advanced geographic mapping techniques and use custom images and geocoding to build spatial visualizations of non-geographic data.
- Prep your data for analysis.
- Combine data sources using data blending.
- Combine data from multiple tables in the same data source using joins.
- Make your visualizations perform as well as possible using the Data Engine, extracts, and efficient connection methods.
- Build better dashboards using techniques for guided analytics, interactive dashboard design, and visual best practices.
- Implement efficiency tips and tricks.

### Audience

## **Prerequisites**

Tableau Desktop I: Fundamentals or equivalent experience.

## **Content**

This course includes a workbook containing key concepts on each topic covered and hands-on activities to reinforce the skills and knowledge attained.
